

Incident Status Summary (ICS-209)

Incident: **BALDY**

1. Incident Name: BALDY		2. Incident Number: WA-COF-001003											
3. Report Version (check one box): Initial <input checked="" type="checkbox"/> Update Final	4. Incident Commander(s) & Agency or Organization: Brian Gales, ICT2	5. Incident Management Organization: Type 2 Team	6. Incident Start Date/Time: Date: 08/01/2015 Time: 1719 CT										
7. Current Incident Size or Area Involved (use unit label – e.g., “Acres”, “Square Miles”): 535 Acres	8a. Percent (%) Contained or Completed: 35 % b. Total Percentage (%) of Perimeter that will be Contained or Completed: 100 %	9. Incident Type: Wildfire B. Incident Description: C. Cause: Unknown D. Fire Suppression Strategy: <table border="1" style="width: 100%; border-collapse: collapse;"> <tr> <th style="width: 50%;">Strategy</th> <th style="width: 50%;">Percent (%)</th> </tr> <tr> <td>Monitor</td> <td></td> </tr> <tr> <td>Confine</td> <td></td> </tr> <tr> <td>Point Zone Protection</td> <td></td> </tr> <tr> <td>Full Suppression</td> <td style="text-align: center;">100</td> </tr> </table>	Strategy	Percent (%)	Monitor		Confine		Point Zone Protection		Full Suppression	100	10. Incident Complexity Level: <input checked="" type="checkbox"/> Single Complex Organization Assessment continues to recommend Type 2 team.
Strategy	Percent (%)												
Monitor													
Confine													
Point Zone Protection													
Full Suppression	100												
11. Report Time Period: From Date/Time: 08/10/2015 2100 CT To Date/Time: 08/11/2015 2100 CT													
12. Prepared By: Print Name: Michelle Ellis, SITL(t) Date/Time Prepared: 08/11/2015 1900 CT		13. Approved By: Print Name: Larry Nickey, Deputy ICT2 Signature: _____											
14. Date/Time Submitted: 08/11/2015 2204 CT		15. Primary Location, Organization, or Agency Sent To: OR-NWC											
16. State: WA	17. County / Parish / Borough: Pend Oreille		18. City:										
19. Unit or Other:	20. Incident Jurisdiction:	21. Incident Location Ownership (if different than jurisdiction):											
22. Latitude/Longitude: Latitude: 48° 49' 7" Longitude: 117° 30' 27"	23. US National Grid Reference: Grid Zone: 11UMQ x-Coordinate: 62116 y-Coordinate: 7914		24. Legal Description: Principal Meridian: Willamette Township: 38N Range: 42E Section: 4 1/4 Sec: NW of 1/4 Sec: SW										
25. Short Location or Area Description (list all affected areas or a reference point): 6 MILES NW OF THE TOWN OF IONE, WASHINGTON			26. UTM Coordinates: Zone: 11 Easting: 462116 Northing: 5407914										
27. Note any geospatial data available (indicate data format, content, and collection time information and labels): GIS data and maps located on the NIFC FTP site http://ftp.nifc.gov/incident_specific_data/pacific_nw/2015_Incidents_Washington/Baldy_WA_COF_001003/GIS/													
28. Observed Fire Behavior or Significant Events for the Time Period Reported (describe fire behavior using accepted terminology. For non-fire incidents, describe significant events related to the materials or other causal agents): Minimal Backing Single Tree Torching Creeping Narrative: Suppression activities have been successful in minimizing fire behavior. Potential still exists for fire to move if interior consumption													

Incident Status Summary (ICS-209)

Incident: **BALDY**

produces spot fires.

29. Primary Fuel Model, Materials, or Hazards Involved (hazardous chemicals, fuel types, infectious agents, radiation, etc):

**Light Logging Slash
Timber (Litter and Understory)
Timber (Grass and Understory)**

Narrative:

FM11 mimics heavy dead and down component with closed canopy. FMs TU5 and GS2 from LANDFIRE are being used for modeling.

30. Damage Assessment Information (summarize damage and/or restriction of use or availability to residential or commercial property, natural resources, critical infrastructure and key resources, etc):

There are structures and a residence on the isolated private property to the north and in the community of Cedar Creek. To the south, southeast and southwest are critical Seattle City Light, Bonneville Power Authority (BPA) and PUD transmission lines and fiber optic lines.

A. Structural Summary	B. # Threatened (up to 72 hrs)	C. # Damaged	D. # Destroyed
E. Single Residences	15	0	0
F. Multiple Residences	0	0	0
G. Mixed Commercial / Residential	0	0	0
H. Nonresidential Commercial Property	1	0	0
I. Other Minor Structures	18	0	0

31. Public Status Summary:

C. Indicate the Number of Civilians (Public) Below:

	Previous Report Total	A. # this Reporting Period	B. Total # to-date
D. Fatalities	0		0
E. With Injuries/Illness	0		0
F. Trapped/In Need of Rescue	0		0
G. Missing	0		0
H. Evacuated	0		0
I. Sheltering in Place	0		0
J. In Temporary Shelters	0		0
K. Have Received Mass Immunizations	0		0
L. Require Immunizations	0		0
M. In Quarantine	0		0
N. Total # Civilians (Public) Affected:	0		0

32. Responder Status Summary:

C. Indicate the Number of Responders Below:

	Previous Report Total	A. # this Reporting Period	B. Total # to-date
D. Fatalities	0		0
E. With Injuries/Illness	0		0
F. Trapped/In Need of Rescue	0		0
G. Missing	0		0
H. Evacuated	0		0
I. Sheltering in Place	0		0
J. In Temporary Shelters	0		0
K. Have Received Mass Immunizations	0		0
L. Require Immunizations	0		0
M. In Quarantine	0		0
N. Total # Responders Affected:	0		0

33. Life, Safety, and Health Status/Threat Remarks:

Currently fire is still on USFS, however, there is a minor threat that the fire may move toward private inholdings with some structures. ICT2 is working with local authorities for pre-planned evacuation procedures and contingency actions. For public safety, an area closure on USFS lands that includes roads and trails is in effect. Significant firefighter hazards include extensive snags, bug and fire-weakened trees, steep terrain, limited safety zones, rolling debris, reburn potential and indirect fireline. Deliberate Risk Analysis completed, updated and approved.

35. Weather Concerns (synopsis of current and predicted weather; discuss related factors that may cause concern):

Another hot and generally dry day was experienced on the fire as a strong ridge remained poised over eastern Washington. Temperatures climbed into the upper 80's to lower 90's with humidity values dropping into the upper teens to mid-twenties. A weak disturbance tracked over the fire in early afternoon resulting in some sprinkles as well as a thunderstorm 30 miles northeast of the fire. Hot and dry weather will continue on

34. Life, Safety, and Health Threat Management:

	Active?
A. No Likely Threat	
B. Potential Future Threat	X
C. Mass Notifications in Progress	
D. Mass Notifications Completed	
E. No Evacuation(s) Imminent	X
F. Planning for Evacuation	
G. Planning for Shelter-in-Place	
H. Evacuation(s) in Progress	
I. Shelter-in-Place in Progress	
J. Repopulation in Progress	

Incident Status Summary (ICS-209)

Incident: **BALDY**

Wednesday with decreasing stability in the upper atmosphere. This could once again lead to a small chance of a thunderstorm during the afternoon.		Active?
	K. Mass Immunization in Progress	
	L. Mass Immunization Complete	
	M. Quarantine in Progress	
	N. Area Restriction in Effect	
	O. Road Closure	X
	P. Trail Closure	X
	Q. Area Closure	X

36. Projected Incident Activity, Potential, Movement, Escalation, or Spread and influencing factors during the next operational period and in 12-, 24-, 48-, and 72-hour time frames:
12 hours: Minor activity, minimal fire growth.
24 hours: Fire is not expected to move outside of existing and proposed containment lines. Potential does exist for interior consumption to provide spot fires which will create extreme fire behavior if wind and slope align.
48 hours: Chance for forecasted hot, dry weather to produce fire behavior that may escape containment lines. If scenario develops, expect wind and slope alignment and extreme fire behavior. Need for active fire monitoring.
72 hours:
Anticipated after 72 hours:

37. Strategic Objectives (define planned end-state for incident):
Where safely possible, direct and indirect suppression tactics are being employed to minimize fire duration and long-term firefighter exposure. Options that balance safety with a high probability of success reducing the risk of fire spread to private lands and residences. Containment and control efforts will protect from loss the Cedar Creek community watershed, PUD and BPA transmission lines, and other FERC infrastructure.

38. Current Incident Threat Summary and Risk Information in 12-, 24-, 48-, and 72-hour timeframes and beyond. Summarize primary incident threats to life, property, communities and community stability, residences, health care facilities, other critical infrastructure and key resources, commercial facilities, natural and environmental resources, cultural resources, and continuity of operations and/or business. Identify corresponding incident-related potential economic or cascading impacts:
12 hours: Threat of escaped fire due to open fireline, inaccessible terrain and lack of safety zones. Fire is burning in heavy down fuels.
24 hours: Threat of escaped fire due to open fireline, inaccessible terrain and lack of safety zones. Fire is burning in heavy down fuels. High temperatures and thunderstorms may increase fire behavior and affect current control efforts.
48 hours: Threat of escaped fire due to open fireline and lack of safety zones. High temperatures and thunderstorms may increase fire behavior and affect current control efforts.
72 hours: Threat of escaped fire due to open fire line and lack of safety zones.
Anticipated after 72 hours: Continued threat to control line until direct construction is completed on Divisions A and Q. Burnout operations are complete.

39. Critical Resource Needs in 12-, 24-, 48-, and 72-hour timeframes and beyond to meet critical incident objectives. List resource category, kind, and/or type, and amount needed, in priority order:
12 hours: None
24 hours: None
48 hours: None

Incident Status Summary (ICS-209)

Incident: **BALDY**

72 hours: None																					
Anticipated after 72 hours:																					
40. Strategic Discussion: Explain the relation of overall strategy, constraints, and current available information to: 1) critical resource needs identified above, 2) the Incident Action Plan and management objectives and targets, 3) anticipated results. Explain major problems and concerns such as operational challenges, incident management problems, and social, political, economic, or environmental concerns or impacts. Consistent support from the Type 1, Type 2 IA crews and aviation resources enhances our ability to maintain progress toward establishing anchor points, prepping lines and conducting burnout operations.																					
41. Planned Actions for Next Operational Period: Continue to build direct line in Divisions A and Q, and monitor backing fire. Continue to mop-up in Divisions A and Q.																					
42. Projected Final Incident Size/Area (use unit label – e.g., “Acres”, “Square Miles”): 600																					
43. Anticipated Incident Containment or Completion Date: 09/30/2015																					
44. Projected Significant Resource Demobilization Start Date: 08/15/2015																					
45. Estimated Incident Costs to Date: \$4,500,000.00																					
46. Projected Final Incident Cost Estimate: \$8,000,000.00																					
47. Remarks (or continuation of any blocks above – list block number in notation):																					
49. Resources (summarize resources by category, kind, and/or type; show # of resources on top ½ of box, show # of personnel associated with resource on bottom ½ of box):
